## ANS5004

## Product Overview

ANS5004 coaxial cable terminal is an EOC Slave based on Atheros 7411L solution. It's has 4 10/100M full duplex Ethernet ports which can simultaneously connect computer, Set Top Box(STB) or other terminals. When working with Richerlink EoC master series, it can reach the maximum physical rate of 700 Mbps and build Layer-2 Ethernet transmit network through television coaxial cable and meanwhile have no influence on the pre-existing CATV signal transmission. ANS5004 occupies low frequency band under 65 MHz and has no collision with the current CATV system frequency which can decrease mutual interference.

ANS5004 support bandwith control and encrypted transmission to satisfy high reliable service. The maximum uplink bandwidth can be configured individually in order to prevent the attack to the whole coaxial transmission network
